Project Proposal: ZeroBuild Studio

A No-Code Multi-Tenant SaaS E-Commerce Platform for Bangladesh

Name	Student ID	Role in Project
Md Shirajul Islam	20245103198	Project Lead, Backend Architecture
Md Sad Ullah	20245103163	System Design & Database Architecture
Sanjana Zarin	20245103169	QA & Test Engineering
Abdullah Al Shawon	20245103200	POS & Courier Integration
Arpita Sannamat	20245103026	Storefront UI & Dynamic Theme Builder

Supervised By: Nahida Akter Tanjila, Lecturer, Dept. of CSE | **Date:** September 20, 2026

1. Executive Summary & Market Rationale

In Bangladesh, thousands of small businesses operate informally via Facebook pages without automated inventory or professional storefronts. ZeroBuild Studio provides an affordable, fully no-code multi-tenant SaaS website builder inspired by platforms like Mukto.shop. Key differentiators include local MFS integration (bKash/Nagad/Rocket), automated domestic courier dispatching, and a unified POS system.

2. Project Snapshot

Parameter	Details
Platform Type	SaaS — No-code e-commerce website builder
Target Audience	SMEs, Facebook F-Commerce sellers, boutique shops
Revenue Model	Tiered monthly (BDT 400), quarterly (BDT 1050), and yearly (BDT 3300) subscriptions
Estimated Timeline	5 – 7 Months (Phased Incremental Development)
Project Budget	Estimated BDT 17 – 26.5 Lakhs (Infrastructure, QA, Marketing)
